

K109 DURA PATCH

Wet Surface Roof Cement

Roofing, Driveway & Flooring

Dura Patch is a high quality, long lasting, non-asbestos fibered asphalt roof cement. Butyl rubber is added to give the cement flexibility and help it to resist cracking. This easily trowelable cement will remain pliable for many years as it forms a durable, weatherproof seal. **Dura Patch** can be used on asphalt built up roofs, composition, metal, masonry, or concrete surfaces.

FEATURES:

- * Use On Asphalt Built Up Roofing, Composition, Felts, Metal, Concrete, Or Masonry
- * Forms A Durable Waterproof Surface
- * Rubber Added For Flexibility & Crack Resistance
- * Will Outlast Plastic Roof Cements

USES:

Dura Patch Can Be Used To Repair Splits, Cracks, Or Blisters In Asphalt Or Composition Roofing. Use It To Adhere 90# Granulated Roofing Paper. It Can Be Used For Sealing Gutters, Skylights, Copings, Vents, Chimneys, Roof Fans & To Fasten Loose Shingles. It Can Be Used To Adhere Or Fix Flashings.

PREPARATION:

Surfaces To Be Coated Must Be Clean & Dry. Remove All Dirt, Dust, Debris, Or Any Other Foreign Matter By Using A Stiff Brush, Forced Air, Or Hosing Off The Roof. Remove Rust With A Wire Brush. If Using On Metal Roofs Decurely Attach Any Loose Panels Before Using The Roof Cement.

COVERAGE:

Approximately 8 Gallons Per 100 Square Feet Depending On Porosity Of Surface & Type Of Repair Being Done.
