

# K112 KWIK SEAL

## *Instant Roof Repair*

## Roofing

**Kwik Seal** emergency roof patch is a natural mineral compound that expands into a gel instantly upon contact with water, to make a temporary, leak proof seal for flat built up roofs. It is the perfect product for sealing leaking roofs in inclement weather. **Kwik Seal** can be applied even in pouring rain and will move through standing water to stop leaks in minutes. No special equipment is required for handling or pouring. It is non-polluting and will not support flame.

### FEATURES:

- \* Stops Leaks Immediately - Even In Pouring Rain Or Through Melting Ice Or Snow
- \* No Need To Identify The Exact Area Of The Leak
- \* Won't Interfere With Permanent Repairs Made Later
- \* May Be Used On Any Flat Roof

### DIRECTIONS:

Pour directly from pail into a 1/2 inch layer over the suspected area of the leak. If the leak does not stop within a couple of minutes pour additional **Kwik Seal**. As long as the **Kwik Seal** stays wet it will continue to seal the leak. When the roof is dry, sweep up the residue and make permanent repairs.
