

K123 OIL ABSORBENT

Oil & Grease Absorbent

Industrial/Automotive Powders Granules & Tablets

To make the most effective absorbent out of the highest quality clay, **Oil Absorbent** uses a unique process of grinding the clay twice, reducing it to granules. Then the granules are suspended in a fluid-bed dryer and, finally, spiraled into a combustion chamber to remove the remaining traces of moisture. The resulting **Oil Absorbent** granules absorb 100% of their weight in liquid.

USES:

Garages, Service Stations, Airports, Terminals, Basements, Platforms, Elevator Shafts, Factories, Printers, Industrial Plants, Machine Shops, Oil Storage Rooms, Railway Shops, Restaurants, Food Plants, Warehouse Floors

FEATURES:

- * **Natural Formula For All Applications** - Highly Absorbent & Non-Flammable. Absorbs Liquids, Including Most Oils, Grease, Inks, Acids, Water & Paints Naturally
- * **Cleans Up Spills & Reduces Hazards** - Keeps Floors Dry, Clean & Safe, Eliminating Slippery Hazards. Granules Can Also Be used As A Fire Extinguisher
