

# K135 ANTI-CLOG

## High Technology Condensation Tablets

## Industrial/Automotive Powders Granules & Tablets

**Anti-Clog** continual release quaternary-based biocide discs are specially formulated to control the growth of a wide range of harmful bacteria, including those causing Legionnaire's Disease. It also effectively controls drain pan slime build up and subsequent overflow, reducing musty odors associated with slime, promoting cleaner, healthier air.

**Anti-Clog** contains the highest concentration (parts per million) of biocide release of any product on the market, and it's low solubility formulation provides consistent, continuous release for over 90 days. **Anti-Clog** leaves no drain pan residue, and contains pH Neutralizers that help protect against corrosion, making it safe on your equipment.

### USES:

#### **Air Conditioning:**

Fan Coil Units, Ceiling Units, Roof Top Units

#### **Refrigeration:**

Display Cases, Vending Machines,  
Beverage & Grocery Reach-In Coolers,  
Cool & Cold Storage Walk Ins

### USED BY:

Schools, Universities, Hotels/Motels, Health Clubs,  
Hospitals, Apartment Buildings, Office Buildings,  
Nursing Homes, Supermarkets

### FEATURES:

- \* Continuous, Consistent Release Over 90 Days
- \* Over 40% Active Biocide (*by weight*)
- \* Quaternary Formula Is Effective Against A Broad Spectrum Of Bacteria
- \* Effectively Kills Legionnaire's Disease Bacteria
- \* pH Neutralizers Protect Against Corrosion
- \* Combats Musty Odors
- \* Safe & Easy To Use
- \* Sealed, Tamper-Proof Housing Prevents Skin Contact With Biocide
- \* Filter Pad Meters Biocide For Consistent Chemical Release
- \* Water-Saturated Filter Pad Prevents Flootation Which Can Plug Drain Pan Hole
- \* Can Be Placed Vertically Or Horizontally
- \* Low Profile - Fits Most Cooling Equipment
