

K139 RPC FILLER

Rubberized Asphalt Crack Filler

DRIVEWAY

Proper use of this crack filler helps eliminate freeze-thaw action on blacktop surfaces that could result in larger cracks and breaks if cracks are not filled. The cured crack filler provides a solid base for traffic, and serves as a filler prior to application of blacktop driveway coating. The one gallon size comes with an easy pour spout that permits easy filling of small cracks up to 1/4" wide. This filler has a long storage life and can be applied to any blacktop surface, with proper preparation, in temperatures of 50°F (10°C) or higher.

FEATURES:

- * Pourable - Ready To Use
- * Adheres Tightly To Sides Of Properly Prepared Cracks & Joints
- * Resists Weather Extremes

SURFACE PREPARATION:

- ◆ Hose Or Blow Off Loose Materials, Dust & Dirt From Cracks
- ◆ Cracks Should Be Damp But Free Of Standing Water
- ◆ Apply When Temperature Is At Least 50°F & When Rain Is Not Likely Within 24 Hours
- ◆ Allow Filler To Dry At Least 1 Week During Good Weather
