

K186 PGL

Clear Penetrating Gel Lubricant (w/Teflon)

Industrial/Automotive Aerosols Lubricants

PGL is a clear high tack, lubricating gel which provides superior lubrication from -30°F to +500°F. This advanced formula penetrates as an oil to the lubrication point, then forms into a tacky grease-like gel. Contains polytetrafluorethylene for added friction reduction. Resists water washout and weathering. Residual film prevents rust and corrosion. Safe on most plastics.

USED BY:

Machine Shops, Heavy Duty Machinery, Automotive Shops, H.V.A.C., Plumbing, Truck Repair, Utilities, Sign Installers, Bus Garages, Municipal Road Garages, Railroads, Hoist Repair Shops

USES:

Chains, Gears, Hinges, Sprockets, Cables, Wire Rope, Slides, Valves, Bushings, Pistons, Shafts, Rings, Seals, Sleeves & Pins

FEATURES:

- * High Tack
- * Wide Temperature Range
-30° To +500°
- * Penetrates As An Oil Then Sets Up To A Tacky Grease-Like Gel
- * Clear Stringing Gel
- * Resists Water Washout
- * Provides A Moisture Resistant Film
- * Protects Against Rust & Corrosion
- * Extension Tubes Included
