

K209 POWERZYME PLUS

Shock Treatment & De-clogger

Sewer & Drain Maintenance Liquids

Powerzyme Plus is a bio-enzymatic, non-caustic shock treatment and de-clogger designed to lubricate and break down organic drain blockages and build-ups. A user-friendly formula that rapidly penetrates clogged drains, grease traps, sump and septic tanks. **Powerzyme Plus** is an effective alternative to traditional acid and caustic drain openers.

Powerzyme Plus will maximize the efficiency of your drain maintenance program. Use initially to break down blockages and build-ups. For difficult drains, this product may be used every other week as a preventative maintenance measure.

Directions:

When treating drains and drain pipes, relieve the drain of as much water as possible. Identify the proper application amount based on the drain size. If a series of drains are clogged, use a bottom-up approach treating the last drain first and the first, last.

For grease traps and holding tanks, apply 32 ounces of product daily until trap is cleared. Continue to treat grease traps daily with a drain maintainer to prevent buildup.

For best results, follow these application recommendations:

Drain Size	Clogged	Slow Drains
1 in.	8 oz.	4 oz.
2 in.	16 oz.	8 oz.
4 in.	32 oz.	16 oz.

FEATURES:

- * Fast Acting
- * Works Through Standing Water
- * Non-Acid / Non-Caustic
- * Non-Corrosive
- * Converts Organic Buildup To Carbon Dioxide & Water
- * Packaged In Pint Containers For Easy, Single Dose Application

USES:

Grease Traps, Drains, Sump Pumps, Pressure Washers, Toilets & Urinals, Septic Systems, Waste Water

SPECIFICATIONS:

Dilution	RTU
pH Level	4.5 - 5.5
Color	Green
Fragrance	Lime
