

K4 RENU

*Cleans, Brightens & Renovates
Filters & Coils*

Industrial/Automotive Liquids Cleaners

Renu coil, fin, & aluminum cleaner is specially formulated to instantly remove heavy accumulations of soil, grease, oxidation and corrosion that occur on aluminum surfaces.

Renu's special blend of acids, inhibitors, and detergents dissolves and suspends all types of soils that normally collect in and around filters, coils and condensers of air conditioners, refrigeration plants and other heat exchange equipment. Simply apply with a mop, brush or pressure sprayer and rinse - soil build up is removed instantly without scrubbing - it's that easy.

Renu is the ideal product for helping keep air handling and heat exchange equipment performing efficiently, extending its life and saving money.

USE ON:

Central/Window Air Conditioners, Refrigeration Equipment, Fins, Window Frames, Condenser Coils, Evaporator Coils, Filters, Uncoated Aluminum, Fan Blades

DIRECTIONS:

As A Coil & Fin Cleaner:

Use undiluted with acid resistant trigger sprayer. Allow product to work for 5-10 minutes. Rinse thoroughly making sure all product residue is removed.

For Cleaning & Brightening Unpainted Aluminum: Medium to heavy soil dilute 25 to 1. Very heavy soil dilute 15 To 1.
