

## Wasp and Hornet Spray 41,000 Volt Dielectric Strength

This rapid contact kill and rapid knockdown wasp, hornet and yellow jacket killer contains Tetramethrins and other active ingredients that literally stop pests in flight. Long-range 20ft. spray allows killing these insects while standing away from their nests. Together with the "instant knock down" effect, this prevents the chances of being stung by attacking insects. The powerful blast valve allows rapid delivery and saturation of nests.

**PUNCH** has a non-chlorinated formulation with a dielectric strength of 41.0 kV (41,000 volts). It may be used indoors or outdoors. The residual action of **PUNCH** will kill insects returning to treated nests days after application.
