

K58 MELT AWAY

Calcium Chloride Pellet w/Inhibitors

Winter Product Liquids & Pellets

Melt Away is a 94-97% calcium chloride pellet containing rust inhibitors and other additives to provide the best ice melting compound available. **Melt Away** uses exothermic technology to generate heat for rapid melting action, penetrating ice and snow quickly, and continues to work at temperatures up to -60 degrees.

Melt Away's pellet form allows for quick penetration of snow and ice. The hygroscopic action absorbs moisture and converts it into brine, speeding up the melting process, working up to 30 times faster than salt without the unsightly powder residue.

USE ON:

Driveways, Parking Lots, Gutters,
Sidewalks, Steps, Paths, Drains,
Down Spouts, Concrete, Asphalt,
Loading Platforms, Railway Switches

FEATURES:

- * Works 30 Times Faster Than Salt
- * Will Not Leave A Powdery Residue To Track In
- * Only 2-4 Ounces Per Square Yard Required
- * Pellets Bore Downward Into Pavement Quicker Than Flakes, Or Other Form For Best Results
- * Works Effectively At -25°F & Will Continue Working Even At -60°F
- * 94-97% Calcium Chloride Means A Highly Active Product. Competitive Blends May Be Less Expensive But Not Nearly As Effective
- * **Melt Away** Causes The Least Harm To Concrete When Compared To All Competitive Brands
- * Properly Applied, **Melt Away** Won't Harm Vegetation
