

K79 EQUIPMENT WAX

Reduces Friction & Prevents Corrosion

Winter Product Liquids & Pellets

Equipment Wax is a coating material specially formulated for snow removal and other heavy equipment. Special chemical additives plate the blades with hard, diamond-like particles to reduce friction and increase the efficiency of snow removal equipment. Application to beds of trucks aids in easy, complete dumping.

Equipment Wax sets quickly, allowing equipment to be used right after application. Special rust and corrosion inhibitors, help to extend the life of your equipment.

USES:

Load Bed Of Trucks, Plows To Reduce Friction & Increase Capacity, Prevents Piling, Protects Against Rust & Corrosion, Dump Trucks, Snow Plows, Equipment

FEATURES:

- * Easy Application
- * Reduces Friction Of Snow & Slush Against The Blade & Reduces The Power Required To Remove A Greater Volume Of Snow & Ice
- * Increases Efficiency Of Snow Removal Equipment
- * Sets Quickly—No Down Time Needed
- * Prevents Piling
- * Protects Against Rust & Corrosion
- * Spray, Brush Or Roll Wax Coating Material Onto Load Bed Of Trucks, Or Plows

SPECIFICATIONS:

Packaged: Drums, 5-Gallon Pail
Appearance: Milky Liquid
Fragrance: Characteristic
Ph: 9.00
Flash Point: None. Nonflammable
