

K85 POWERZYME

*Active Bacteria Digests Odors,
Bio-Enzymatic Drain Maintainer*

Sewer & Drain Maintenance Liquids

A combination of enzyme, and genetically engineered living bacteria designed to quickly digest grease and other organic waste. Our bacteria produce significant enzyme quantities including protease, amylase, lipase, and cellulose. These enzymes “cleave” larger organics into smaller particles for bacterial consumption and conversion to CO² and water. A safe, non-acid, non-caustic, effective way to treat the drain system. Contains no acids or harsh alkali - digest grease nature’s way.

USES:

Sink Drains, Wash Basins,
Shower Stalls, Bath Tubs,
Septic Tanks, Port-a-Toilets,
Outhouses, Recreational Vehicles,
Marine Holding Tanks, Lagoons,
Garbage Disposals, Tile Fields

FEATURES:

- * Salmonella Free - **Powerzyme** Contains Only Non-Pathogenic Bacteria
- * Contains A Superb Malodor Counteractant To Deodorize Instantly While Actually Consuming The Organic Odor’s Source
- * Excellent Sulfur Scavengers - **Powerzyme’s** Bacteria Help To Reduce The Obnoxious Odor Of Hydrogen Sulfide Gas Produced In Many Drain Lines
- * Resistant To Quats, Phenols, & Chlorine - Through Special Genetic Adaptations In Our Bacteria, **Powerzyme** Is Resistant To Quaternary Ammonium Compounds, Phenols & Chlorines At Lower Concentrations
- * High Bacteria Count - Over 200 Billion Genetically Engineered Bacteria Per Gallon
