

KA230 LIQUID FERTILIZER 4-12-8

Fertilizer That Promotes Root Development

Agronomy Liquids

Liquid Fertilizer 4-12-8 is designed for use in newly seeded areas, or for late season winterizing. Its special application formula has a high phosphorous content to toughen and promote growth, while extra potassium encourages proper stalk development. Its low nitrogen content assures safe application without burning at any time of the year.

FEATURES:

- * High Phosphorous Levels Promote Root Development
- * High-Potency Blend Is Ideal As A Late Season Winterizer
- * Safe For Application Throughout The Year
- * Can Be Applied Directly, Or Injected Into Irrigation Systems

USE ON:

Ornamental Turf, Shrubs,
Athletic Fields, Golf Greens,
Newly Seeded Areas, Nursery Stock

SPECIFICATIONS:

Appearance: Liquid
